Wave Connect (previously Azuz IT) has been serving business and marine clients for over a decade.

Your success means everything

Everyone at Wave Connect is motivated to help customers maintain a boat they love. We're here for you, every step of the way. That means providing quality services backed by expert support - all designed to bring about long-term success for your vessel.

FAQ's

Bringing the **smallprint** into focus

What does unlimited data mean?

Your customers Fleet, Vessel Owners, Guests and Crew will be drenched in Endless Social Media, Endless streaming services, you can stream as much as you like on YouTube, Netflix, Prime Video, all carefree without worrying about your data consumption. Our business-grade SIMs have higher priority and there is no FUP in place, so data is genuinely infinite.

What are the data speeds with these SIMs?

Obviously, this depends on the location and the stability of the local cellular network. However, the speed will vary from location to location, as there are multiple things to consider. For instance, how advanced the country's cellular network is, how close the vessel is to the nearest cell tower and how congested the network is in the local area.

Does the SIM Roam on any Network?

We were very particular, we wanted to offer SIM cards which are unsteered, which means they are not tied to a specific network while roaming. Our Infinite SIM cards will automatically connect or switch to the strongest signal available, picking up the best carrier in each location.

Which countries are covered by each unlimited data SIM card?

Which countries are covered by each unlimited data SIM card?

All European countries are included except for Turkey and Montenegro. Turkey and Montenegro have different rules and regulations for the rest of the Mediterranean countries. Anybody in the yachting industry will know about these particular countries being an issue! We have local contacts in each location where we can assist the vessel there too.

FAQ's

Bringing the **smallprint** into focus

What happens if I roam outside of the 40 inclusive countries?

Roaming charges will be added to your monthly bill however, to avoid any nasty surprises if you cruise outside the specified roaming zone, we can log into the Pepwave router remotely or advise you how to block any usage in those countries. So if you do not wish to use the service outside of its intended use we highly recommend you do this to be safe.

Are there any upfront deposits taken for this service?

This depends on whether you are able to configure your data router to avoid roaming out of area. We can also assist with blocking country codes that are not configured. If you are unable to block out of area countries, we require a refundable deposit of 2000€.

Are there any shipping costs involved for the delivery of the SIM?

No, we ship our SIM's worldwide to your preferred address.

Will my existing 4G hardware work with these Sims?

4G/5G technology is forever changing, and the global networks are being upgraded daily. We recommend that your equipment be no older than 2 to 3 years. We strongly recommend that you have MIMO omnidirectional external antennas with a high throughput modem. As Peplink partners and Poynting Antennas resellers, we also have the market-leading hardware available if you are considering an upgrade.

FAQ's

Bringing the **smallprint** into **focus**

Do you offer support for clients with any connectivity issues?

You can call or email us directly, and we will attempt to resolve the issue remotely. We issue all of our clients a checklist for things to check to help guide them through any connection issues; however, we are always at the end of the phone or email.

If the issue is related to the service, then we have a direct line to the cellular network for troubleshooting any problems. If the issue is related to the infrastructure onboard, our certified Peplink engineers can troubleshoot and help to get your network back online. As Peplink Gold partners and Poynting Antennas resellers, we also have the market-leading hardware available if you want to upgrade.

Roaming charges

Bringing the **smallprint** into **focus**

SCHEDULE 1 – ROAMING CHARGES

- It is recommended that you check whether your router is compatible and will work with a foreign network before going abroad, especially for countries outside of Europe.
- Please note that not all networks listed will necessarily cater to the whole country, especially in large countries such as the USA. You can check this [coverage map](#) to check whether a network will cover the area you are visiting.
- Rates may vary due to changes made by mobile networks in visited countries or exchange rate fluctuations.
